DogeGiving

Official Whitepaper

The Dogegiving whitepaper aims to help educate investors on the goals of the Dogegiving token project. We believe that investors are entitled to information regarding projects that they hold. This document will outline the tokenomics and a brief roadmap of the Dogegiving token.

Tokenomics:

The Dogegiving contract is a novel smart contract on the Binance Smart Chain coded by the developer of Dogegiving. The project launched with unique rewards coding unlike other rewards tokens where contract sells will trigger rewards countless times. At Dogegiving sells are limited to 0.5% per transaction and manual claim for cheaper gas fees and less contract sells.

The current tokenomics of the token involve a taxation on purchase which is divided into four categories:

8% Rewards: *Up to 8% of every buy/sell is redistributed to the $DOGEGIVING holders in the form of DOGE.*

3% Auto locked liquidity: *A healthy liquidity pool equals less volatility.*

3% Marketing: *With community effort and our marketing funds we will be on track to strengthening a future with "use-case".*

The percentage dedicated to specific categories are liquid according to project needs, however DogeGiving strives to only keep 14% on Buys & Sells.

Dogegiving has a total supply of 1 billion tokens. Buybacks will be coordinated with the community events to assist with punishing paper-hands and providing value to our holders. To ensure a healthy holder base, no distribution other than the 4.5% team wallet was given at launch.

Roadmap:

Dogegiving Token aims to be listed on Coin Market Cap and Coin Gecko during Q4 2021. This will assist in raising awareness and providing additional visibility for our investors.

Dogegiving Token will continue to utilize the marketing budget to establish relationships with influencers

Dogegiving Token will continue efforts on establishing relationships with *high value* exchanges that will reflect our holders wishes, and who have values symmetrical to those held by the developers.

A dashboard for tracking the dividend Dogegiving rewards will be released so that transparent tracking is visible to holders on the blockchain.

The Dogegiving project will be searching for auditors at a TBA date.

How do I buy DogeGiving?

1.) Set up a Metamask or Trust Wallet address

2.) Send BNB to your wallet from Binance

3.) Click our "BUY ON PANCAKESWAP" button and connect your wallet
